As a Privileged Census Enumerator, I approach all buildings and households with enthusiasm, explaining the census's importance and purpose with a warm smile and courteous greeting. Fulfilling my responsibilities with pride and dedication, I recognize the national significance of this task.

During my time at Vellore Institute of Technology, I excelled in a challenging curriculum, refining my programming skills and achieving fluency in multiple languages. Through various projects and coursework, I tackled complex programming challenges and delivered high-quality solutions.

Recently, I collaborated with a professor on a research project titled "Fake Production Detection Using Blockchain," successfully submitting it to the International Journal of Modern Education and Computer Science. This experience enhanced my understanding of emerging technologies and improved my programming expertise.

Now armed with a B.Tech. degree, I am eager to apply my skills to address real-world problems and advance in the field of computer science.

Work Experience

Census Taker

10/2021 to 11/2021

"Central Bureau of Statistics (CBS), Nepal"

Kavrepalanchok, Nepal

- Brought relevant language skills and cultural familiarity to successfully access neighborhood residents.
- Performed field staff duties critical to completing an accurate count in hard-to-reach communities.
- Visited assigned neighborhoods and knocked on doors to encourage participation in the Census.
- Served as the last line of defense to obtain an accurate count for federal funding and fair political representation.
